GLOSSARY OF ICONS

New		New style or colour related to last release
Advertising		Advertising campaign style
Best Seller		Best seller style as for sell-out forecast
Front Material		Specifics of front material for an evaluation of different methods of adjusting the frame
Temple Material		Specifics of side material for an evaluation of different methods of adjustment
Size		Horizontal size of the lenses to better adapt to facial fitting. The size is defined with "Boxing" system
Height		Maximum height of the lenses defined with "Boxing" system to evaluate usage for prescription
Diameter		Maximum diameter of the lenses: the measure is meant to determine the minimum diameter of the lenses to fill the ring
Base		External lens base, i.e. lens bending radius
Bridge		Bridge size defined with "Boxing" system
Side lenght		Side lenght for a better evaluation of facial fitting
Flex / Spring Hinge		Hinge which keeps its initial balance and adjustment, thereby avoiding the need for subsequent adjustments.
Rxable		Sunglass frame which can be fitted for a prescription lens.
Glass Lenses		Glass has always been considered the ideal material in manufacturing lenses for the correction and protection of eyesight.
